

# Contents

<b>1</b>	<b>Introduction</b>	<b>6</b>
1.1	Motivation . . . . .	6
1.2	Goals of the Project . . . . .	7
1.3	Outline . . . . .	7
<b>2</b>	<b>Theory</b>	<b>8</b>
2.1	Stress Dependency of Elastic Properties . . . . .	8
2.2	Porosity Deformation Approach (PDA) . . . . .	10
2.2.1	Orthorhombic rock . . . . .	10
2.2.2	TI rock under triaxial load . . . . .	12
2.2.3	Compliant porosity and stress sensitivity . . . . .	13
2.2.4	TI rock under isostatic load . . . . .	14
2.3	Further development of the Porosity-Deformation Approach . . . . .	15
2.3.1	The coordinate system . . . . .	15
2.3.2	Theory for a HTI rock under triaxial load . . . . .	15
2.3.3	VTI rock under uniaxial load . . . . .	16
2.3.4	HTI rock under uniaxial load . . . . .	17
2.4	Applicability on Saturated Rocks . . . . .	18
2.4.1	Influence of Saturation on the Results . . . . .	19
<b>3</b>	<b>Application of PDA, Part I</b>	<b>20</b>
3.1	Application on literature data . . . . .	20
3.1.1	Description of Data set . . . . .	20
3.1.2	Determination of Compliance Matrix and Fitting Routine . . . . .	21
3.1.3	Isostatic Dataset . . . . .	23

3.1.4	Discussion Isostatic Dataset . . . . .	23
3.1.5	Stress Sensitivity Properties . . . . .	25
3.1.6	Triaxial Dataset . . . . .	27
3.2	Dependence of $S_{44}^{pda}$ - $S_{66}^{pda}$ on Stress Sensitivity Properties . . . . .	29
3.2.1	Dependence of $S_{44}^{pda}$ on Stress Sensitivity Properties . . . . .	29
3.2.2	Dependence of $S_{55}^{pda}$ on Stress Sensitivity Properties . . . . .	30
3.2.3	Dependence of $S_{66}^{pda}$ on Stress Sensitivity Properties . . . . .	31
<b>4</b>	<b>Experimental Methodology and Investigated Rock Samples</b>	<b>32</b>
4.1	Experimental Setup . . . . .	32
4.1.1	Primary Equipment . . . . .	32
4.1.2	Extended Equipment . . . . .	32
4.1.3	Sensors, Clamps, Errors . . . . .	33
4.1.4	Deformation Measurement Equipment . . . . .	36
4.2	Stress Distribution in the Sample under Uniaxial Loading Conditions . . . . .	37
4.2.1	Model setup . . . . .	38
4.2.2	Results . . . . .	38
4.2.3	Discussion . . . . .	39
4.2.4	Conclusions . . . . .	41
4.3	Phase or group velocity? . . . . .	41
4.4	Measuring Procedure . . . . .	42
4.4.1	Incomplete datasets . . . . .	42
4.4.2	Complete datasets . . . . .	42
4.5	Samples - incomplete datasets . . . . .	45
4.5.1	South African Sandstone SAS . . . . .	45
4.5.2	Obernkirchner Sandstone OK . . . . .	45
4.5.3	Sandstone from Quarry Bilshausen: BiSu . . . . .	46
4.5.4	Posidonian marl shale, Dotternhausen Do and DH . . . . .	46
4.5.5	Opalinus-Clay SG02 . . . . .	48
4.6	Samples - complete datasets . . . . .	49
4.6.1	Upper Carboniferous BaZ VTI . . . . .	49
4.6.2	Late Cretaceous Dr01 HTI . . . . .	50

<b>5</b>	<b>Experimental Results</b>	<b>51</b>
5.1	Results - incomplete datasets . . . . .	51
5.1.1	Sandstones . . . . .	51
5.1.2	Discussion . . . . .	53
5.1.3	Shales Do VTI & HTI, DH VTI and SG02 VTI & HTI . . . . .	56
5.1.4	Discussion . . . . .	59
5.2	Results - complete datasets . . . . .	61
5.2.1	Upper Carboniferous BaZ VTI . . . . .	61
5.2.2	Late Cretaceous Dr01 HTI . . . . .	64
<b>6</b>	<b>Application of PDA, Part II</b>	<b>72</b>
6.1	Application on Incomplete Datasets, VTI samples . . . . .	72
6.1.1	Incomplete Datasets . . . . .	72
6.1.2	Results and Discussion of Modelling . . . . .	73
6.2	Application of PDA - complete datasets . . . . .	77
6.2.1	Upper Carboniferous BaZ VTI . . . . .	77
6.2.2	Late Cretaceous Dr01 HTI . . . . .	78
6.2.3	Discussion . . . . .	81
<b>7</b>	<b>Uniaxial Stress Data: Summary and Discussion</b>	<b>82</b>
7.1	Samples and Measuring Procedure . . . . .	82
7.2	Sandstones . . . . .	82
7.2.1	Interpretation of Data . . . . .	82
7.2.2	Application of Porosity-Deformation Approach . . . . .	83
7.3	Shales . . . . .	83
7.3.1	Interpretation of Data . . . . .	83
7.3.2	Application of Porosity Deformation Approach . . . . .	84
7.4	Discussion . . . . .	84
<b>8</b>	<b>Conclusions</b>	<b>85</b>

<b>A Elastic Properties</b>	<b>93</b>
A.1 Determination of Stiffness Tensor . . . . .	93
A.1.1 TI rock . . . . .	93
A.1.2 Orthorhombic Rock . . . . .	94
A.2 Determination of Compliance Tensor . . . . .	95
A.2.1 TI rock . . . . .	95
