

Fundamentals of Deformation and Fracture

Eshelby Memorial Symposium
Sheffield, 2–5 April 1984

Edited by
B. A. Bilby, K. J. Miller and J. R. Willis

CONTENTS

Obituary of J. D. Eshelby	1
Publications of J. D. Eshelby	5
B. A. Bilby	
Introductory lecture	11
J. R. Rice	
Conserved integrals and energetic forces	33
P. J. Olver	
Symmetry groups and path-independent integrals	57
A. G. Herrmann	
Conservation laws, the material momentum tensor and moments of elastic energy	73
T. Mura	
General theory of inclusions	75
L. J. Walpole	
The analysis of the overall elastic properties of composite materials	91
L. R. F. Rose	
Theoretical aspects of reinforcement and toughening	109
N. Laws & G. J. Dvorak	
The loss of stiffness of cracked laminates	119
O. B. Pedersen	
Mean field theory and the Bauschinger effect in composites	129
J. K. Lee & W. C. Johnson	
Elastic interaction and elastoplastic deformation of inhomogeneities	145
L. B. Freund	
The mechanics of dynamic crack growth in solids	163

A. V. Granato	
Dislocation damping and phonon scattering	187
C. Atkinson	
Invariant integrals for some time dependent crack and heat conduction problems	203
J. D. Achenbach & Z.-L. Li	
Plastic deformations near a rapidly propagating crack tip	217
K. B. Broberg	
What happens at fast crack growth?	233
A. S. Argon, C. W. Lau, B. Ozmat & D. M. Parks	
Creep crack growth in ductile alloys	243
H. Lilholt	
Strength contributions during creep of composite materials	263
T. Mori	
Suppression of grain boundary sliding by second phase particles	277
H. Riedel	
A continuum damage approach to creep crack growth	293
Z. Hashin	
Thermal expansion of polycrystalline aggregates	311
G. W. Greenwood	
The roles of dislocation motion and vacancy fluxes in creep	313
P. B. Hirsch	
Dislocations in semiconductors	325
P. L. Pratt	
Dislocations in ionic crystals	339
L. M. Brown	
Image stress and the Bauschinger effect in dispersion-hardened alloys	357
B. L. Eyre	
Geometry and behaviour of prismatic dislocation loops and stacking fault tetrahedra	369
P. M. Hazzledine	
Direct observations of anisotropic and surface effects on dislocations	385

D. J. Bacon	
Dislocations in anisotropic elastic media	401
G. K. Wong & D. M. Barnett	
A dislocation method for solving 3-D crack and inclusion problems in linear elastic solids	417
R. Bullough & J. R. Willis	
Interactions of point defects and dislocations	439
F. R. N. Nabarro	
Material forces and configurational forces in the interaction of elastic singularities	455
G. Herrmann	
Material balance laws in one-dimensional strength-of-materials theories	461
G. E. Cardew, M. R. Goldthorpe, I. C. Howard & A. P. Kfoury	
On the elastic T-term	465
K. J. Miller	
Initiation and growth rates of short fatigue cracks	477
L. M. Brown & S. L. Ogin	
Role of internal stresses in the nucleation of fatigue cracks	501
R. P. Gangloff & R. O. Ritchie	
Environmental effects novel to the propagation of short fatigue cracks	529
D. L. Davidson & J. Lankford	
Experimental mechanics of fatigue crack growth: the effect of crack size	559
A. T. Winter	
Cyclic deformation: the two phase model	573
Z. S. Basinski & S. J. Basinski	
Surface geometry in fatigued copper crystals	583
PAPERS NOT PRESENTED ORALLY	
G. I. Barenblatt & L. R. Botvina	
Similarity methods in fracture	595
H. D. Bui	
A path-independent integral for mixed modes of fracture in linear thermoelasticity	597

G. P. Cherepanov	
Plasticity and creep mechanics from the viewpoint of the theory of elasticity	605
POSTER SESSION	
J. A. Planell & F. Guiu	
Cyclic deformation of molybdenum crystals at 400 K	625
R. S. Lakes	
Experiments in Cosserat mechanics	626
E. R. De Los Rios, Z. Tang & K. J. Miller	
Short crack fatigue behaviour in medium carbon steel	627
J. E. Sinclair	
Slip and cleavage from blunted cracks	628
Author index	629
