

Contents

1	Introduction	1
1.1	Purpose	1
1.2	Some terminology	2
1.3	Electrical analogues	3
1.4	State determined systems	4
1.5	Simulation languages	6
2	Exponential growth	8
2.1	Analytical and numerical integration	8
2.2	Simulation	10
2.3	Time constant and time interval of integration	16
2.4	Integration method and time interval	18
3	The growth of yeast	22
3.1	Description of the system	22
3.2	Relational diagrams	23
3.3	Simulation	26
3.4	Logistic growth	29
4	Interference of plants	31
4.1	Replacement series	31
4.2	Density of sowing	34
4.3	Simulation of plant interference	39
4.4	Further modelling aspects	43
4.4.1	The INDEX and MACRO feature	43
4.4.2	The INITIAL and DYNAMIC section	47
5	Growth and competition of Paramecium	49
5.1	Description of the system	49
5.2	A simulation program	51
5.3	Preliminary estimation of parameters	54
5.4	Final determination of parameters	56
5.5	Stochastic aspects	59
5.6	The programming of probability functions	61
6	Modelling of development, dispersion and diffusion	66
6.1	Introduction	66
6.2	Physiological age and development stage	68
6.3	Demographic models	70

6.3.1	Age-classes	70
6.3.2	Errors of approximation	72
6.3.3	The matrix method	76
6.4	Germination models	78
6.4.1	Boxcar train without dispersion	78
6.4.2	Boxcar train with constant relative dispersion	80
6.4.3	Boxcar train with controlled dispersion	84
6.4.4	Refinements	86
6.5	The flow of heat in soils	87
7	Growth and development of <i>Helminthosporium maydis</i>	91
7.1	Introduction	91
7.2	The weather	92
7.3	Appearance and growth of lesions	94
7.4	Sporophore or stalk formation	96
7.5	Sporulation of green stalks	99
7.6	Sporulation of dried stalks	101
7.7	Dispersal of spores	102
7.8	Germination of spores and penetration of germ tubes	106
7.9	Timing, initialization and output organization	108
7.10	Results and sensitivity analyses	110
8	Population models for fruit-tree red spider mite and predatory mites	115
8.1	Fruit-tree red spider mite	115
8.2	Predatory mite, <i>Amblyseius potentillae</i>	121
8.3	Relations between predator and prey	122
8.4	Preference as a competitive process	123
8.5	Verification	126
9	Solutions of the exercises	130
	References	167
	Appendix A	169
	Appendix B	171
	Index	173
