Contents

<i>Preface</i>	<i>vii</i>
----------------	------------

1	
The Nature of Quaternary Pollen Analytical Data	1
1.1 Pollen Analysis as a Quaternary Palaeoecological Technique	1
1.2 Types of Quaternary Pollen Analytical Data	10
1.3 Methods of Presenting Quaternary Pollen Analytical Data	18
1.4 The Data Used	25

2	
Basic Statistical Concepts	27
2.1 The Rôle of Statistics in Pollen Analysis	27
2.2 Description of the Binomial and Multinomial Distributions	29
2.3 The Binomial and Multinomial Distributions in Palynology	33
2.4 Further Statistical Examples in Quaternary Palynology	34
2.5 Exploratory Data Analysis and Classification	37
2.6 The Measurement of Dissimilarity	41

3	
The Analysis of Pollen Stratigraphical Data: Zonation	47
3.1 The Concept of the Pollen Zone	47
3.2 Numerical Approaches to Pollen Zonation	51
3.3 The Constrained Single Link Method	56
3.4 Binary Divisive Procedures	59
3.5 Dynamic Programming Algorithm	64
3.6 The Variable Barriers Approach	67

3.7 Examples of Numerical Zonations	70
3.8 Advantages and Limitations of Numerical Zonations	86

4

The Analysis of Pollen Stratigraphical Data:

Comparison of Sequences	91
4.1 Rationale of Comparing Pollen Sequences	91
4.2 Numerical Approaches to Comparing Stratigraphical Sequences	92
4.3 Comparison of Sequences in the Absence of Stratigraphical Constraints: Zone-By-Zone Comparisons	95
4.4 Comparison of Sequences in the Absence of Stratigraphical Constraints: Classification Methods	96
4.5 Comparison of Sequences by Slotting	105
4.6 Numerical Comparisons of Abernethy Forest	113
4.7 Other Examples of Numerical Comparisons	128
4.8 Properties of the Numerical Methods of Comparison	137

5

The Analysis of Modern Pollen Data **141**

5.1 Introduction	141
5.2 Numerical Approaches to the Analysis of Modern Pollen Data	143
5.3 Presentation and Comparison of Modern Pollen Spectra from Different Vegetation Types	146
5.4 Modelling Modern Pollen-Vegetation Relationships	182

6

The Interpretation of Pollen Stratigraphical Data **205**

6.1 Quantitative Approaches to Interpretation	205
6.2 Sequence-Splitting, Curve-Fitting, and Time Series Analysis	210
6.3 The Use of Pollen-Representation Factors	225
6.4 Comparing Modern and Fossil Pollen Spectra	236
6.5 Recurrent Groups	246
6.6 Environmental Reconstructions	252

<i>Appendix: The Program ZONATION</i>	265
