Introduction	1
Chapter 1 Producing Performance	8
1.1 Why the shift to Producing Performance?	8
1.1.1 The Stone Age Economy - cents per kilogram	12
1.1.2 The Industrial Economy -€ per kilogram	12
1.1.3 The Performance Economy - (million) €per gram	13
1.2 Producing performance: How it works!	14
1.2.1 Smart solutions - Creating wealth from knowledge	15
1.2.2 Exploiting scientific and technological progress - Living with uncertainty	16
1.2.3 Prevention strategies	43
1.2.4 Sufficiency strategies	49
1.2.5 Systems solutions - Smart solutions	56
1.3 Systems solutions through radical changes in framework conditions	66
1.3.1 Radical changes by court order	66
1.3.2 Radical changes by new national legislation	68
1.3.3 Radical changes through people's power	70
1.3.4 Radical changes through partnerships	71
1.4 Change drivers	76
1.4.1 Daring	76
1.4.2 Environmental impact as facilitator	77
1.4.3 Social sciences as facilitator	77
1.5 How to overcome obstacles	80
1.5.1 Insurance as enabler of technology	81
1.5.2 Regionalisation of the economy	83
1.6 How to measure it!	84

Chapter 2	Selling Performance	86
2.1	Why the shift to selling performance in the Functional Service Economy?	86
2.1.1	The 'Factor Time'	88
2.1.2	The case for internalising the costs of risk and of waste	90
2.1.3	Incentives for integrating 'Factor Time' into the economy via extended performance responsibility	92
2.1.4	Selling performance versus the sale of goods	95
2.2	Selling performance in the Functional Service Economy: How it works!	97
2.2.1	The origins of the Service Economy	97
2.2.2	From the Service Economy to the Functional Service Economy	99
2.2.3	From the supply chain to the performance chain	100
2.3	The structure of the economy selling performance	101
2.4	Markets and economic actors selling performance	104
2.4.1	Performance services in Business-to-Business (B2B) markets	109
2.4.2	Performance management services in B2B markets	125
2.4.3	Performance services in Business-to-Government (B2G) markets	140
2.4.4	Performance services in Business-to-Consumer (B2C) markets	153
2.4.5	Generic performance management services	158
2.5	Change drivers	165
2.5.1	Competitiveness in the market as change driver	165
2.5.2	Corporate memory can be a strong driver	166
2.5.3	Supply-driven performance selling is still the norm	167
2.5.4	Demand-driven performance buying is growing	168
2.5.5	Legal frameworks as change driver	168
2.5.6	Exploiting science and technology as change driver	170
2.6	How to overcome obstacles	170
2.6.1	A global competition of corporate culture	170
2.6.2	A global competition of legal systems	172
2.6.3	Market-inherent obstacles	173
2.7	How to measure it!	175

Chapter 3	Managing Performance Over Time	179
3.1	Why the shift to managing performance over time?	179
3.1.1	Using goods in the Lake and the Loop Economy	181
3.1.2	Managing performance over time - creating jobs at home	183
3.1.3	Pursuing cost efficiency	183
3.1.4	Managing performance over time - increasing corporate and national competitiveness	184
3.2	Maintaining performance over time: How the Lake and the Loop Economy work	186
3.2.1	The Lake Economy	189
3.2.2	The Loop Economy	192
3.2.3	The principles behind the Lake and the Loop Economy	194
3.3	The Lake Economy - Optimising the management of physical assets	201
3.3.1	The shift from consumption to utilisation	202
3.3.2	The Lake Economy of infrastructure and durables	206
3.3.3	Fleet managers of the Lake Economy	208
3.3.4	The Lake Economy of molecules	222
3.4	The Loop Economy - The art of reuse, remanufacturing and remarketing	222
3.4.1	The shift from cradle-to-nature to cradle-to-grave, then to grave-to-cradle	223
3.4.2	The case for loop 1 - Product-life extension of goods	225
3.4.3	The case for loop 2 - The Loop Economy of molecules	241
3.5	Change drivers	251
3.5.1	The quest for the highest competitiveness	251
3.5.2	Science and technology innovations	252
3.5.3	Commercial innovations	253
3.5.4	Cultural innovations: The 'caring' index	254
3.5.5	Autarky as driver	256
3.6	How to overcome obstacles	258
3.6.1	Creating the missing tools	258
3.6.2	Creating the missing support	259
3.6.3	Creating incentives for product reuse and remanufacturing	261
3.6.4	Creating the missing university curricula and educational support	263

3.6.5	Creating incentives for innovation - The role of framework conditions	264
3.7	How to measure it!	266
Chapter 4	Sustainability and the Performance Economy	269
4.1	In praise of chaotic self-regulating systems	269
4.1.1	The market economy as a dynamic self-regulating system	269
4.1.2	Nature as a chaotic self-regulating system	270
4.1.3	Society as a dynamic self-regulating system	270
4.1.4	Innovation as a chaotic self-regulating system	271
4.2	The concept of sustainability	271
4.2.1	The Quality Cube of the Performance Economy	273
4.2.2	The OECD's decoupling and composite indicators	273
4.2.3	World resource consumption	275
4.2.4	Sustainability benchmarks and metrics	278
4.3	The relevance of the Performance Economy to emerging economies	278
4.4	The relevance of the Performance Economy to industrialised countries	280
4.5	What are the drivers of change?	282
4.5.1	Interdisciplinary solutions	282
4.5.2	Intersectoral solutions	282
4.5.3	Sustainable investments	282
4.6	The link between performance, culture and sustainability	283
4.6.1	The five pillars of a sustainable society	283
4.6.2	Sustainability is also a competition of cultural models	285
4.6.3	The need for a dynamic model	286
