Part I Basic Principles and the Problem of Climate Forecasts

| | | |
|----------|--|-----------|
| 1 | Key Concepts in Climate Modeling | 3 |
| 1.1 | What Is Climate? | 3 |
| 1.2 | What Is a Model? | 7 |
| 1.3 | Uncertainty | 10 |
| 1.3.1 | Model Uncertainty | 10 |
| 1.3.2 | Scenario Uncertainty | 10 |
| 1.3.3 | Initial Condition Uncertainty | 11 |
| 1.3.4 | Total Uncertainty | 11 |
| 1.4 | Summary | 12 |
| 2 | Components of the Climate System | 13 |
| 2.1 | Components of the Earth System | 13 |
| 2.1.1 | The Atmosphere | 14 |
| 2.1.2 | The Ocean and Sea Ice | 17 |
| 2.1.3 | Terrestrial Systems | 18 |
| 2.2 | Timescales and Interactions | 20 |
| 2.3 | Summary | 22 |
| 3 | Climate Change and Global Warming | 23 |
| 3.1 | Coupling of the Pieces | 24 |
| 3.2 | Forcing the Climate System | 26 |
| 3.3 | Climate History | 29 |
| 3.4 | Understanding Where the Energy Goes | 30 |
| 3.5 | Summary | 34 |
| 4 | Essence of a Climate Model | 37 |
| 4.1 | Scientific Principles in Climate Models | 38 |
| 4.2 | Basic Formulation and Constraints | 41 |
| 4.2.1 | Finite Pieces | 41 |
| 4.2.2 | Processes | 43 |

| | | |
|--------------------------------|--|-----------|
| 4.2.3 | Marching Forward in Time | 49 |
| 4.2.4 | Examples of Finite Element Models | 50 |
| 4.3 | Coupled Models | 50 |
| 4.4 | A Brief History of Climate Models | 52 |
| 4.5 | Computational Aspects of Climate Modeling | 53 |
| 4.5.1 | The Computer Program | 53 |
| 4.5.2 | Running a Model | 56 |
| 4.6 | Summary | 57 |
| Part II Model Mechanics | | |
| 5 | Simulating the Atmosphere | 61 |
| 5.1 | Role of the Atmosphere in Climate | 62 |
| 5.2 | Types of Atmospheric Models | 66 |
| 5.3 | General Circulation | 69 |
| 5.4 | Parts of an Atmosphere Model | 71 |
| 5.4.1 | Clouds | 74 |
| 5.4.2 | Radiative Energy | 76 |
| 5.4.3 | Chemistry | 76 |
| 5.5 | Weather Models Versus Climate Models | 78 |
| 5.6 | Challenges for Atmospheric Models | 79 |
| 5.6.1 | Uncertain and Unknown Processes | 79 |
| 5.6.2 | Scales | 80 |
| 5.6.3 | Feedbacks | 81 |
| 5.6.4 | Cloud Feedback | 81 |
| 5.7 | Applications: Impacts of Tropical Cyclones | 83 |
| 5.8 | Summary | 85 |
| 6 | Simulating the Ocean and Sea Ice | 87 |
| 6.1 | Understanding the Ocean | 88 |
| 6.1.1 | Structure of the Ocean | 88 |
| 6.1.2 | Forcing of the Ocean | 89 |
| 6.2 | “Limited” Ocean Models | 90 |
| 6.3 | Ocean General Circulation Models | 92 |
| 6.3.1 | Topography and Grids | 92 |
| 6.3.2 | Deep Ocean | 93 |
| 6.3.3 | Eddies in the Ocean | 96 |
| 6.3.4 | Surface Ocean | 97 |
| 6.3.5 | Structure of an Ocean Model | 100 |
| 6.3.6 | Ocean Versus Atmosphere Models | 101 |
| 6.4 | Sea-Ice Modeling | 101 |
| 6.5 | The Ocean Carbon Cycle | 104 |
| 6.6 | Challenges | 104 |
| 6.6.1 | Challenges in Ocean Modeling | 105 |
| 6.6.2 | Challenges in Sea Ice Modeling | 105 |

| | | |
|----------|---|------------|
| 6.7 | Applications: Sea-Level Rise, Norfolk, Virginia | 106 |
| 6.8 | Summary | 107 |
| 7 | Simulating Terrestrial Systems | 109 |
| 7.1 | Role of the Land Surface in Climate. | 109 |
| 7.1.1 | Precipitation and the Water Cycle. | 110 |
| 7.1.2 | Vegetation. | 110 |
| 7.1.3 | Ice and Snow. | 111 |
| 7.1.4 | Human Impacts | 112 |
| 7.2 | Building a Land Surface Simulation | 113 |
| 7.2.1 | Evolution of a Terrestrial System Model | 113 |
| 7.2.2 | Biogeophysics: Surface Fluxes and Heat | 115 |
| 7.2.3 | Biogeophysics: Hydrology | 116 |
| 7.2.4 | Ecosystem Dynamics (Vegetation and Land Cover/Use Change) | 118 |
| 7.2.5 | Summary: Structure of a Land Model | 120 |
| 7.3 | Biogeochemistry: Carbon and Other Nutrient Cycles | 121 |
| 7.4 | Land-Atmosphere Interactions | 125 |
| 7.5 | Land Ice | 126 |
| 7.6 | Humans | 129 |
| 7.7 | Integrated Assessment Models | 131 |
| 7.8 | Challenges in Terrestrial System Modeling | 132 |
| 7.8.1 | Ice Sheet Modeling | 132 |
| 7.8.2 | Surface Albedo Feedback | 133 |
| 7.8.3 | Carbon Feedback | 134 |
| 7.9 | Applications: Wolf and Moose Ecosystem, Isle Royale National Park. | 134 |
| 7.10 | Summary | 136 |
| 8 | Bringing the System Together: Coupling and Complexity | 139 |
| 8.1 | Types of Coupled Models | 139 |
| 8.1.1 | Regional Models | 140 |
| 8.1.2 | Statistical Models and Downscaling | 141 |
| 8.1.3 | Integrated Assessment Models | 143 |
| 8.2 | Coupling Models Together: Common Threads | 144 |
| 8.3 | Key Interactions in Climate Models | 147 |
| 8.3.1 | Intermixing of the Feedback Loops. | 147 |
| 8.3.2 | Water Feedbacks | 148 |
| 8.3.3 | Albedo Feedbacks | 149 |
| 8.3.4 | Ocean Feedbacks | 150 |
| 8.3.5 | Sea-Level Change | 150 |
| 8.4 | Coupled Modes of Climate Variability | 151 |
| 8.4.1 | Tropical Cyclones | 151 |
| 8.4.2 | Monsoons | 152 |

| | | |
|-------|---|-----|
| 8.4.3 | El Niño | 152 |
| 8.4.4 | Precipitation and the Land Surface | 153 |
| 8.4.5 | Carbon Cycle and Climate. | 153 |
| 8.5 | Challenges | 154 |
| 8.6 | Applications: Integrated Assessment of Water Resources. | 155 |
| 8.7 | Summary | 157 |

Part III Using Models

| | | |
|-----------|---|-----|
| 9 | Model Evaluation | 161 |
| 9.1 | Evaluation Versus Validation. | 161 |
| 9.1.1 | Evaluation and Missing Information | 162 |
| 9.1.2 | Observations | 164 |
| 9.1.3 | Model Improvement | 168 |
| 9.2 | Climate Model Evaluation. | 169 |
| 9.2.1 | Types of Comparisons | 169 |
| 9.2.2 | Model Simulations | 170 |
| 9.2.3 | Using Model Evaluation to Guide Further Observations | 172 |
| 9.3 | Predicting the Future: Forecasts Versus Projections. | 173 |
| 9.3.1 | Forecasts | 173 |
| 9.3.2 | Projections | 173 |
| 9.4 | Applications of Climate Model Evaluation: Ozone Assessment | 174 |
| 9.5 | Summary | 175 |
| 10 | Predictability | 177 |
| 10.1 | Knowledge and Key Uncertainties | 178 |
| 10.1.1 | Physics of the System. | 178 |
| 10.1.2 | Variability | 180 |
| 10.1.3 | Sensitivity to Changes. | 180 |
| 10.2 | Types of Uncertainty and Timescales | 181 |
| 10.2.1 | Predicting the Near Term: Initial Condition Uncertainty | 182 |
| 10.2.2 | Predicting the Next 30–50 Years: Scenario Uncertainty | 183 |
| 10.2.3 | Predicting the Long Term: Model Uncertainty Versus Scenario Uncertainty | 189 |
| 10.3 | Ensembles: Multiple Models and Simulations | 191 |
| 10.4 | Applications: Developing and Using Scenarios. | 195 |
| 10.5 | Summary | 196 |

| | |
|---|-----|
| 11 Results of Current Models | 199 |
| 11.1 Organization of Climate Model Results | 199 |
| 11.2 Prediction and Uncertainty | 200 |
| 11.2.1 Goals of Prediction | 201 |
| 11.2.2 Uncertainty | 202 |
| 11.2.3 Why Models? | 203 |
| 11.3 What Is the Confidence in Predictions? | 204 |
| 11.3.1 Confident Predictions | 205 |
| 11.3.2 Uncertain Predictions: Where to Be Cautious | 210 |
| 11.3.3 Bad Predictions | 212 |
| 11.3.4 How Do We Predict Extreme Events? | 214 |
| 11.4 Climate Impacts and Extremes | 215 |
| 11.4.1 Tropical Cyclones | 216 |
| 11.4.2 Stream Flow and Extreme Events | 216 |
| 11.4.3 Electricity Demand and Extreme Events | 217 |
| 11.5 Application: Climate Model Impacts in Colorado | 217 |
| 11.6 Summary | 219 |
| 12 Usability of Climate Model Projections by Practitioners | 221 |
| 12.1 Knowledge Systems | 222 |
| 12.2 Interpretation and Translation | 224 |
| 12.2.1 Barriers to the Use of Climate Model Projections | 225 |
| 12.2.2 Downscaled Datasets | 226 |
| 12.2.3 Climate Assessments | 227 |
| 12.2.4 Expert Analysis | 228 |
| 12.3 Uncertainty | 228 |
| 12.3.1 Ensembles | 231 |
| 12.3.2 Uncertainty in Assessment Reports | 231 |
| 12.4 Framing Uncertainty | 232 |
| 12.5 Summary | 235 |
| 13 Summary and Final Thoughts | 237 |
| 13.1 What Is Climate? | 237 |
| 13.2 Key Features of a Climate Model | 238 |
| 13.3 Components of the Climate System | 239 |
| 13.3.1 The Atmosphere | 240 |
| 13.3.2 The Ocean | 241 |
| 13.3.3 Terrestrial Systems | 242 |
| 13.3.4 Coupled Components | 243 |
| 13.4 Evaluation and Uncertainty | 244 |
| 13.4.1 Evaluation | 244 |
| 13.4.2 Uncertainty | 245 |
| 13.5 What We Know (and Do not Know) | 246 |

| | | |
|---|--|-----|
| 13.6 | The Future of Climate Modeling | 248 |
| 13.6.1 | Increasing Resolution | 248 |
| 13.6.2 | New and Improved Processes. | 249 |
| 13.6.3 | Challenges. | 250 |
| 13.7 | Final Thoughts. | 251 |
| Climate Modeling Text Glossary | | 255 |
| Index | | 271 |
